CONTEMPORARY COLLECTION

Rota

angelettiruzza design

CRIRT205

This timeless collection emphasizes substance over appearance, where the rigor of synthesis enhances the vitality of the material. The apparent mechanical simplicity conceals a concentration of ancient and powerful symbols. At first glance, the design may seem devoid of tenderness, but upon closer inspection, it reveals archaic meanings. From above, the handle shows a point surrounded by a circle, a symbol of the Sun and Gold in primitive cultures. Retains a connection to the industrial world, with references to gears and an austere aesthetic, but also offers a higher dimension, linked to the sacred symbolism of the circle and the Japanese concept of mu (the energetic void). It symbolizes the wheel of life, a continuous movement.The soul of the series is both industrial and sophisticated, recalling the three-spoked handwheel of mechanical lathes, merged with the natural elegance suggested by its pedestal. Being raised from its base and surrounded by emptiness, the ROTA handle has a precious allure, capable of elegantly furnishing sophisticated bathrooms.
